Greening the Affordable Housing Portfolio:  
Upgrading Multi-Family Housing and Encouraging Tenant Involvement  
An EBHO Affordable Housing Week Event

Friday, May 13, 2011, 8:30 am – 11:30 am  
Eden Issei Terrace, 200 Fagundes Court, Hayward, CA 94544  
(Located off of Jackson Street near freeway access. Parking available on Cypress Ave. & in surrounding neighborhood. ADA accessible.)

Green buildings provide increased comfort and well-being for residents, preserve our environment and natural resources for future generations, and reduce maintenance requirements and utility bills. While a good portion of newly constructed affordable housing is built to a green standard, a significant portion of the overall affordable housing stock was built before such standards existed.

Please join Eden Housing, Enterprise Community Partners, and StopWaste.org in a moderated panel discussing national, regional, and local programs and tools that support green retrofitting of existing multi-family housing and resident engagement and education. The event will kick-off with a keynote address by HUD Regional Director Ophelia Basgal, followed by an informative panel discussion, and a brief “flip the switch” ceremony dedicating the new solar system at an Eden Housing community that was developed in 1984.

Check-in, continental breakfast, and property viewing will begin at 8:30 a.m.; the program will begin at 9:00 a.m. Please RSVP by Tuesday, May 10th to (510) 247-8101 or RSVP@edenhousing.org.
